OH YEAH! Bow Wow, a rap and hip-hop artist, comes into the list at number 97. Who better to take this spot?

Now, you may be wondering why not higher on "the list". Well I can explain that. I mean this man is hot. Super hot. The reason why Bow Wow is only number 97 is first because he is too short. I mean I am 5'3" so I need someone a little taller than 5'5". And the second reason is he seems a little too muscular for his body. He is skinny but has muscle so it doesn't look right for his body.

But reasons he is on the list is he has the most gorgeous brown eyes I have ever seen. I mean most people are noticed for blue eyes or green eyes but Bow Wow really does have the best BROWN eyes. They are a light brown with little dark flakes in them. Hot.

Plus he has a nice smile. It is seriously almost perfect. His white teeth just shine next to his sexy dark skin. Nothing better than perfect teeth on either man or women. Nobody wants to kiss someone with crooked, sticking out, yellow, shark teeth.

It also helps that Bow Wow can sing. There is just something extremely hot about singers. Maybe it is because they can sing love songs to you and actors can't really act to you. I mean you don't want them being such a good actor that they can lie straight to your face and you not even know it. So this helps his cause on the 100 hottest men list.

My favorite song that he does is "Shorty Like Mine". I think it is just a cute song to be singing and it is one of those songs you want him to sing to you.

He also does another song with a new artist named Tiffany Evans, and the song is called "I'm Grown". So that just proves he works well with other girls; I mean just others. This is actually also a really good song but not a song you sing to your boyfriend or girlfriend. More like a parent or guardian.

So these are the reasons the sexy Bow Wow comes into the list at number 97. We are still working down the list. Who is next? And more importantly who is number one? [youtube}N2U2N-LUsHE{/youtube}](http://www.youtube.com/watch?v=N2U2N-LUsHE)
