Name: Kanye West

Born: June 8, 1977 in Atlanta, Georgia

Eye Color: dark brown

Hair Color: black

Height: 5'8 ½"

Sign: Gemini

Rank: #90

Kanye West coming in number 90 is not only a hottie but he is an awesome hip-hop/ rap artist. Kanye West is also known for producing and writing songs.

I first heard of Kanye West in 2005 when he came out with the song "Gold Digger" but it wasn't until his album Graduation came out, that I actually fell in love with his music. My favorite song by him is "Stronger" because it fun to listen to. I keep saying songs need to be fun to listen to and this song and the X factor. In fact it is not only one of my favorite songs by him but it is one of my favorite songs, period.

This man is also very sexy. I mean I do not even need to say anything. You can look at him yourself and see how hot he is. But I guess I could say a few words just because I like talking about hot guys. He is muscular! He is another one of those guys that fills out a shirt really well with all those muscles. I mean does he have a license for those guns. He is in the gun show and I have tickets. HA-HA.

Kanye West is tall, dark, and handsome. He is almost flawless. The only thing I want to see is him smile more. In a lot of pictures he looks so angry. But, oh well, it works for him. But when he does smile he has a sweet smile. Not the best on the list but it is still a great one.

And those are the reasons why the wonderful Kanye West is on our hot guys list. Not that you needed reasons, you just need eyes to see him and you will understand. But since he is so hot and so high up, there must be some major hotties to come.
