Name: Jason Biggs

Born: May 12, 1978 in Pompton Plains, New Jersey

Eye Color: brown

Hair Color: brown

Height: 5'9½"

Sign: Taurus

Rank: #85

Oh Jason Biggs, Jason Biggs! This American actor just sweeps me off my feet. What can I say about his extreme hotness? What makes this man so wonderfully good looking? Well its everything&hellip;

We'll start with his great sense of humor. You know how you can look at someone and just know they have a awesome personality. Well Jason Biggs is one of those people. It is something in his smile. He has a big white smile! He just like a genuine happy person and it makes you feel good to be around genuine happy people.

I loved him in "Over Her Dead Body". He is a very good actor and once again he was really funny in it. He was pretending to be gay to get close to this girl and it blew up in his face. But he made me laugh with his sarcastic attitude through out it.

Okay now we are on to his looks! One thing I like about him is his dark hair and eyes. Like I said in a previous guy, I like dark hair and dark features. That sounds a little weird but I am attracted more to guys with dark hair and eyes then ones that have light ones. I think it has to do with that whole tall dark and handsome thing&hellip; because that is exactly what Jason Biggs is.

Another reason why Jason Biggs is hot is because he is tall. Any guy that is tall already has a tally mark next to his name. But this is just another great trait in Jason Biggs. I guess it is another one of those tall dark and handsome things.

Of course it helps that Jason Biggs has a hot body too! I do not know if he plays any sports but he looks like he has a sports body. He was probably pretty athletic when he was in high school. I like guys that athletic because they are fit and fun. Plus they have other stuff to do besides work and sleep.

Well now we are talking! Jason Biggs coming in number 85 is our 16th guy down. We just keep getting closer and closer. Before you know it we will be at our number one? Still don't know who it is? Well stick around and find out.
