Katherine Marie Heigl (born November 24, 1978)

Next up for the hott girls list is the one any only Katherine Heigl. Katherine is another just like the last 2 that is a little bit Jekyll and Hyde. One day I think she is one of the hottest girls on the planet and the next time I see her she is completely plain Jane. Lighting and makeup is all I have to say about that. Hollywood has the ability to make the some really weird looking chicks look really great. I don't think it is all a masquerade with Katherine though, I think she has a lot of natural beauty.

With her it is mostly about the body, and wow what a body. I know there isn't a guy on earth that doesn't think she has everything it would take to keep a guy happy. ß Code for she is smokin hot. I have quite a few pictures of her for this post so you might want to scroll slowly to avoid heart complications. Yes, she is so hott the pictures might make your heart skip a beat, so take it easy and know that you have been warned.

If you haven't had the opportunity to check her out in the movie "Knocked up", I suggest you run out to your local blockbuster today and rent it. You will not be disappointed. She is not only looking great in the movie but she has a great role that will make you a fan of hers for years to come. Yes she is really 30 years old but let me tell you something that is the absolute truth. 30 is just the beginning for women, they aren't really worth a darn before then so it is fitting that she takes her place on the list with the other 2 youngsters. In fact I am sure that she won't even be close to the oldest hotty to make the list. Enjoy these hot pics and check back for more real soon.
